

Extra Practice: 4.2 Parts of an Expression and More Verbal Expressions

Write each as an algebraic expression.

1) the sum of x and 11

2) the quotient of n and 2

3) the quotient of d and 6

4) the quotient of 12 and v

5) the quotient of n and 3 is 49

6) n more than 12

7) 10 increased by c

8) 18 decreased by 10

9) x cubed is equal to 29

10) 12 more than x

Identify the parts of the expression (coefficients, like terms and constant terms) and state the number of terms in each expression.

11) $6x - 3 + 5x$

12) $-10v - 9v$

13) $2k - 6 - 3k$

14) $8x + 8x$

15) $5p + 4 + 2$
