Write each statement using number, variables and operations.

1. Four times a number increased by the product of 3 and the quantity of a number plus one.
2. Twice the quantity of the difference of a number and 2 is less than 44 .
3. The quotient of -8 and a number is equal to 16 .
4. Twelve is less than some number.
5. Twelve less than some number is greater than 22.
6. The sum of 12 and a number doubled is at least 35 .
7. A number cannot exceed 47 .
8. 15 more than a number is equal to 4 times the quantity of a number minus 3 .
9. 18 less than some number is at most 44 .
10.18 is more than some number squared.

Identify the terms, coefficients, constant terms and like terms for each expression. Then simplify each expression.

1. $3 x y+14 x+8 y-9 x+12-6 x-(-2 x y)+3 y-5$

| Terms | Coefficients | Constant <br> terms | Like Terms | Simplified |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |

2. $12 x+8 x^{2}-3 x+9 x^{2}-2+7 x-1 x^{2}$

| Terms | Coefficients | Constant <br> terms | Like Terms | Simplified |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |

3. $13-9 a b+2 a-b$

| Terms | Coefficients | Constant <br> terms | Like Terms | Simplified |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |

4. $3 y-6 x y+5-8 y-x+5-x+9 x y-4+x^{2}$

| Terms | Coefficients | Constant <br> terms | Like Terms | Simplified |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |

5. $15 x-11+y-9 y$

| Terms | Coefficients | Constant <br> terms | Like Terms | Simplified |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |
